Another part of the job paying proper attention to its resources is monitoring its own pro features. I've found the Shadows dialog in Photoshop and Lightroom to be missing in Lightroom 5, processing a photograph with the Bristle brush or Cloning Stamp. It also opens the brush or stamp file for me to apply it within the editing area without me having to go and find it. This is one feature that could come in handy, and one that could be added in the future. The features and functions of the app have not really changed much in the recent years. Lightroom 5 may not add a new feature that hasn't been in use since before Photoshop CS2 and Lightroom 1.0. The WYSIWYG interface is still there, with changes being so subtle that many may not even notice it exists at all. Photoshop has also recently added the "Reset Perspective" tool that helps you to get a better look at what's going on. By clicking on it, a new set of hand correction tools are available. Also, the tool set in Photoshop's "Vertical/Horizontal" and "Grid Overlay" areas are now located on the left side of the feature set area. This tool covers all the aspects of a photo's reshaping in a vertical/horizontal or grid view. This view is the default mode, so it is not disrupted by this slightly changed location. I am also used to using the Print Layout tool, which offers a way to create small prints, flyers, and postcards easily in Photoshop. It has been the standard tool in the Creative Suite since Photoshop 3.0 I think. Adobe has not refreshed this tool much in the years since then, such as adding a Paper Size parameter or removing the Preview feature that opened up in an image file. The Print Layout tool is still there, but these features are still absent. I had to close my Image Viewer window and then reopen it to get it to work again. The Preview now sends a file to the Print Module instead of attempting to preview it.

The popular image editing tool Photoshop is known for its powerful features and high dynamic range. But it is a shortcoming of the editor that it does not have background blending.
