At this stage, I very rarely shoot any images from places that I'd consider landscapes. My experience with various available stitched panoramic and 360 shoot-around apps is that the results are sometimes great, but they don't always feel natural. As such, I'm not sure I see the App I would use for taking landscape photographs from a place like a city, or shooting public events, etc. For that scenario, the App at hand is probably more appropriate.

Where it really shines is in the mobile space. Photoshop skill & speed will always be the priority and this is reflected in the iOS app's new iOS 11 features and a web app optimized for both smart phones and tablets. "In order to provide our customers with the best tools to make their mark with the latest features made possible by the latest technology updates, we are making available a major upgrade to Photoshop for Mac. This includes the addition of new features introduced in Adobe Photoshop CC for standard and Creative Cloud subscribers, as well as new features available for Creative Cloud Extended subscribers. "More than 65% of our customers are on Macs," explains Jeff Dailey, director of product planning Photoshop for Apple and Adobe. "New features in Photoshop for Mac will make the most experienced Mac users even more productive, as they move from the desktop to mobile devices and the web." "Starting with Photoshop CC, we have made extra room in the Mac App Store's Photoshop category for Creative Cloud Admins and subscribers to call home and ensure that they have access to the latest and greatest features and updates to Photoshop. We all know that a company's best moves are those that take our imaginations and passions and transcend the products we love. Adobe transforms each of our passions into something that helps others and impacts the world around us. It's about more than just creating detail and beauty with image-making software. It's about creating the next generation of software and hardware, using elements of an existing software platform to design parts of a future software platform. That's what the creative community needs - a new way to consistently and easily collaborate, to simply share and to challenge others to think like they do.
